TIP Trimmer

Finish in perfection!

**Innovative
wet-sharpening and
trimming device
for tungsten electrodes.**

Safe ...quick ...easy!

Fullfills all requirements
of EU-regulation 98-24; binding of
hazardous respirable dust.

www.tiptig-international.com

The TIP Trimmer is the first sharpening device, that can handle both sharpen and trimming of tungsten electrodes.

Safety first

The hazardous, respirable dust is collected in an easy replaceable, sealed container.
No extraction unit required.

Easy, clean, safe!

Sharp as sharp can

Wet grinding is always the best way to sharpen a tungsten electrode.
The grinding angle is continuously adjustable and is digitally displayed.

Repetitious process with perfect result!

High life

Lateral off-set of the electrode guidance allows triple usage of the diamond grinding disc.
Up to 10.000 sharpening cycles are possible.

High lifetime = lower costs!

Size matters

With the TIP TRIMMER you can trim your tungsten electrodes at will, down to a minimum length of 10 mm.

With the right accessories you can handle electrode diameters from 1,0 mm to 8,0 mm.
